## **LIFELONG LEARNING FOR ADULTS** **Rethinking the dynamics of lifelong learning**

*11<sup>th</sup> session, LYON*

*Hôtel de Région, 1 Esplanade François Mitterrand*

**30 September - 2 October 2013**

*How to promote innovation in adult learning?*

In the European context of crisis, the gap between the skills and competences acquired by individuals and those needed by the labour market requires to fundamentally rethink lifelong learning policies.

The economic situation and the labour transformations need people with more diversified skills and competences. People looking for a work, people on precarious jobs or people with disabilities are confronted with more difficulties.

In this context, there is a compelling need for reconfiguring LLL.

*How to put in practice the dynamics of alliances, networks and actors in territories?*

Lifelong learning is not only the right to follow complementary training sessions. It is the possibility of enriching our capacities, abilities, knowledge on a permanent and continuous basis through labour experiences and citizenship activities.

It is a collective and cooperative mode of learning. It deserves to be sustained, supported and encouraged in a process toward progress.

How to implement it on a territory (a space where resources, innovation potential and a network of actors are linked up)?

*How should we reconfigure the links between actors, organisations and systems in order to face and adapt to changes?*

*How does the European strategy take into account these new stakes?*
